PROFILE

Computer Science undergraduate in my internship year with a strong interest in digital marketing, growth strategy and conversion-focused design. Experienced in creating landing pages, ad creatives and marketing assets while applying SEO, analytics and AI tools to improve user engagement. Passionate about learning performance marketing and contributing to real-world campaigns.

Portfolio: Landing pages, branding projects and marketing case studies available at portfolioyashendri.vercel.app

MARKETING TOOLS

Google Analytics 4 · Meta Ads Manager · Canva · Google Tag Manager (learning) · HubSpot · Mailchimp (learning) · Google Search Console (learning)

- **CRM & Email :** Nodemailer/SMTP · Double opt-in · Email sequence design
- **Productivity :** Git · GitHub Actions · Notion · Google Workspace

LANGUAGES

English: Fluent **Sinhala:** Native **Tamil:** Intermediate

DESIGN & MARKETING PROJECTS

Stella Fit — Personal Training Landing Page 2026

HTML · CSS · JavaScript · Claude AI · Branding

- Designed a warm, empowering brand system — palette, typography and tone — around a 'training as self-care, not punishment' positioning for women aged 25–45
- Built the full page in HTML, CSS and JavaScript using AI-assisted development, then hand-tuned spacing, hierarchy and responsive breakpoints
- Structured the page using an AIDA flow (Attention → Interest → Desire → Action) — trust signals, programs, social proof, single CTA
- Defined an A/B test for the primary CTA ('Book Your Discovery Call' vs. 'Start Your Journey'), specifying GA4 event tracking on the button click as the measurement method(not yet implemented on the live site)

DropSwift — SaaS Landing Page + Ad Campaign + Email Nurture Sequence 2026

HTML · CSS · JavaScript · Canva · Leonardo.ai · Nodemailer

- Designed a clean, conversion-focused interface using a navy and orange palette to signal trust and urgency for an ecommerce automation product, then built it fully in HTML, CSS and JavaScript
- Designed two ad strategies for different funnel stages — a cold-traffic angle using a Problem–Agitate–Solution structure, and a social-proof-led retargeting angle
- Built and sent a 3-email post-signup nurture sequence (welcome, objection-handling, conversion push) using Nodemailer, moving new signups toward a paid upgrade

OTHER PROJECTS

Backend Developer — CookMate (AI Recipe Mobile App, Team) 2025–2026

Node.js · Firebase Authentication · Firestore · React Native · TypeScript

- Built secure email OTP password reset with time-limited Firestore codes and anti-enumeration protection
- Implemented Google Sign-In, Firebase Admin SDK auth, token session management and the full user API
- Designed Firestore data structure for user favorite recipes, allergy management preferences, and ratings and reviews

github.com/yehenidodanwela/CookMate

Personal Portfolio Website 2026

HTML · CSS · JavaScript · Bootstrap · EmailJS · GA4

- Designed and built my own portfolio end to end, applying on-page SEO structure and personal branding throughout
- Instrumented the site with Google Analytics 4 and actively monitor real visitor traffic sources and engagement
