

# YASHENDRI SENEVIRATHNA

## Computer Science Undergraduate

Sri Lanka | [yashendrisenevirathna@gmail.com](mailto:yashendrisenevirathna@gmail.com) | [portfolioyashendri.vercel.app](https://portfolioyashendri.vercel.app) | [github.com/Yashendri](https://github.com/Yashendri) | [linkedin.com/in/yashendri-senevirathna-044930305](https://linkedin.com/in/yashendri-senevirathna-044930305)

## PROFILE

---

Computer Science undergraduate in the internship year of a joint University of Westminster / IIT Colombo degree, working at the intersection of design, marketing and web development. Builds complete brand and marketing projects end-to-end — landing pages, ad creatives, email sequences and GA4 measurement plans — alongside production web applications using React, Node.js and Firebase. Combines a design-first, detail-oriented eye with a genuine technical foundation, and uses AI tools deliberately to move faster without cutting corners on quality.

## SKILLS & STRENGTHS

---

- **Marketing & Strategy:** Campaign structuring, funnel-stage ad strategy (cold vs. retargeting), landing page CRO, email sequence design, A/B testing fundamentals, SEO fundamentals
- **Design:** Canva, Figma (basic), ad creatives, social media visuals, typography and colour systems, brand identity
- **Development:** HTML, CSS, JavaScript, TypeScript, React, React Native, Node.js, Firebase, Git/GitHub
- **Analytics & Measurement:** Google Analytics 4, event tracking, performance interpretation, basic reporting
- **AI-Assisted Workflows:** Claude AI, ChatGPT, GitHub Copilot — used for content generation, copywriting and development speed, always with hands-on refinement
- **Strengths:** Creative thinking, attention to detail, analytical thinking, self-direction, organisation, teamwork, problem-solving

## DESIGN & MARKETING PROJECTS

---

### Stella Fit — Personal Training Landing Page & Brand System

2026

HTML · CSS · JavaScript · Canva · Claude AI

- Designed a full brand system — palette, typography and tone — around a 'training as self-care' positioning for women aged 25–45, then built the page in HTML, CSS and JavaScript.
- Structured the page on an AIDA flow (Attention → Interest → Desire → Action) with trust signals, programme details, social proof and a single clear CTA.
- Defined an A/B test for the primary CTA with a GA4 event-tracking plan as the measurement method.

### DropSwift — SaaS Landing Page, Ad Strategy & Email Nurture Sequence

2026

HTML · CSS · JavaScript · Canva · Nodemailer

- Designed and built a conversion-focused landing page for a fictional ecommerce automation product, using a navy-and-orange palette chosen to signal trust and urgency.
- Developed two ad strategies for different funnel stages: a cold-traffic Problem–Agitate–Solution angle and a social-proof-led retargeting angle, with supporting creatives.
- Built a 3-email post-signup nurture sequence (welcome, objection-handling, conversion push) using Nodemailer.

### Personal Portfolio Website

2026

HTML · CSS · JavaScript · GA4

- Designed and built a seven-page portfolio end to end, applying on-page SEO structure and a consistent design system to present projects and case studies.
- Instrumented the site with Google Analytics 4 to track real visitor traffic sources and engagement.

### CookMate — AI Recipe Mobile App (Team Project)

2025–2026

Node.js · Firebase Authentication · Firestore · React Native · TypeScript

- Built authentication for a team mobile app, including Google Sign-In and email-based password reset with time-limited Firestore codes.
- Designed the Firestore data structure supporting user favourites, allergy preferences, and ratings and reviews.

## CERTIFICATIONS & LEARNING

---

- Google Analytics 4 — Google Skillshop, [certified](#)
- Meta Digital Marketing Associate (100-101) — Meta Blueprint, in progress
- Social Media Marketing — HubSpot Academy, in progress

## EDUCATION

---

### BSc (Hons) Computer Science — Internship Year (Year 3 of 4)

University of Westminster, UK — delivered through Informatics Institute of Technology (IIT), Colombo | 2024–Present

*Relevant modules: Web Development, Database Systems, Client-Server Architecture, Object-Oriented Programming*

GCE Advanced Level (Biological Science) — Biology B, Chemistry C, Physics C

GCE Ordinary Level — 8 A passes, 1 B

## ADDITIONAL INFORMATION

---

Languages: English (Fluent), Sinhala (Native), Tamil (Intermediate) | Availability: Available for internships
