

Yashendri Senevirathna

Digital Marketing | Creative Design | AI Automation

yashendrisenevirathna@gmail.com • linkedin.com/in/yashendri • github.com/Yashendri • Matara, Sri Lanka

PROFILE

Computer Science undergraduate (University of Westminster UK, delivered through IIT Sri Lanka) in my internship year, actively transitioning into digital marketing and creative design. I combine a technical foundation with a genuine passion for visual communication, AI-powered content creation, and building marketing systems that generate real business results. I pick up new tools quickly and bring structured thinking to creative work.

SKILLS

Design	Canva · landing page design · ad creatives · social media visuals · typography & colour basics
AI Tools	Claude AI · ChatGPT · GitHub Copilot · Grok — content generation, copywriting, automation logic
Marketing	Lead generation · email marketing · Meta Ads fundamentals · conversion copywriting · SEO basics
CRM & Email	GoHighLevel (learning) · Nodemailer/SMTP · double opt-in · email sequence design
Development	HTML · CSS · JavaScript · Node.js · React · React Native · TypeScript · Java · Firebase
Productivity	Git · GitHub Actions · Figma (basic) · Notion · Google Workspace

MARKETING & DESIGN PROJECTS

SaaS Landing Page Design | MapFlow — GIS Analytics Platform 2026 — In progress

[HTML] [CSS] [JavaScript] [Conversion design] [Copywriting] [SEO] [Responsive]

High-converting product landing page for a fictional B2B SaaS platform targeting US utility companies.

- Designed and coded a full 10-section landing page — hero, problem/solution, features, pricing, social proof, and CTA — applying classic conversion copywriting structure
- Wrote all page copy: headline, subheadlines, feature descriptions, testimonials, and CTAs using pain-before-solution framework
- Built a fully responsive, mobile-first layout with sticky navbar, smooth scroll, fade-in animations, and hamburger menu
- Applied SEO fundamentals: semantic HTML5 structure, meta description under 160 chars, Open Graph tags, single H1, descriptive alt text
- Anchored pricing to the mid tier (Pro) using the anchoring effect; highlighted with 'Most Popular' badge to drive conversions

B2B Lead Generation System | MapFlow Email Capture — Waitlist Tool 2026 — In progress

[Node.js] [Express] [Nodemailer] [Lead gen] [Email automation] [GDPR concepts]

End-to-end lead capture system simulating a real B2B SaaS waitlist tool — frontend form, backend, automated email, and lead storage.

- Built a conversion-optimised 4-field signup form with role dropdown for lead segmentation; implemented loading, success-fade, and error states to reduce form abandonment
- Built Node.js/Express backend with server-side validation, lead storage to JSON, and an admin review endpoint

- Integrated Nodemailer (Gmail SMTP) to send branded HTML confirmation emails automatically on each signup
- Applied double opt-in and GDPR compliance principles — understanding why email list quality matters for B2B marketing

DEVELOPMENT PROJECTS

Backend & Security Engineer | CookMate — AI Recipe Mobile App (Team) 2025 – 2026

[Node.js] [Firebase] [React Native] [REST API] [CI/CD] [TypeScript]

AI-powered recipe app; I owned authentication, security infrastructure, and DevOps for the team.

- Built secure Email OTP password reset with time-limited Firestore codes and anti-enumeration protection
- Implemented Google Sign-In, Firebase Admin SDK auth, token session management, and full user API
- Set up GitHub Actions CI/CD pipeline and Jest unit testing framework; fixed TypeScript compilation errors blocking Render deployment

Frontend Developer | Estate Agent Web App 2025

[React] [JavaScript] [CSS] [Responsive design]

- Built a full React SPA for property browsing — search, filter, and detail views — with responsive, component-based layout
- github.com/Yashendri/estate-agent-client-side-web-app

EDUCATION

BSc (Hons) Computer Science — Internship Year (Year 3 of 4) | University of Westminster, UK | IIT Sri Lanka 2024 – Present

- UK-affiliated degree delivered through Informatics Institute of Technology (IIT), Colombo
- Key modules: OOP · Web Development · Database Systems · Algorithms · Networks

CERTIFICATIONS & LEARNING

- Meta Blueprint — Facebook Ads Fundamentals (in progress)
- Google Analytics 4 Certification — Google Skillshop (in progress)
- GoHighLevel CRM — self-directed learning via official documentation and tutorials

Open to internship and junior roles in digital marketing, creative design, and AI automation • Available immediately
