PROFESSIONAL SUMMARY

Computer Science undergraduate with a growing focus on digital marketing, creative content and digital experiences. Enjoys understanding how people interact with digital products and combining creative thinking with technical knowledge to create clear and engaging online experiences. Currently building practical skills in social media marketing, SEO, Google Analytics and content creation through self-learning, certifications and personal projects. Looking for an internship to learn from an experienced team, contribute ideas and apply both creative and technical skills.

SKILLS

Digital Marketing & Analytics: Google Analytics 4 • Social Media Marketing • SEO Fundamentals • Content Creation • Basic Reporting • Data Interpretation

Design & Creative: Canva • Figma (Basic) • Visual Design • Brand Identity • Typography • Colour Systems

Technical: HTML • CSS • JavaScript • TypeScript • React • React Native • Node.js • Firebase • SQL • Git/GitHub

AI-Assisted Tools: ChatGPT • Claude AI • GitHub Copilot

2024 – Present

University of Westminster (Delivered through Informatics Institute of Technology (IIT) – Sri Lanka)

Relevant coursework: Web Development, Database Systems, Client-Server Architecture, Object-Oriented Programming

GCE Advanced Level — Biological Science

Biology — B • Chemistry — C • Physics — C

GCE Ordinary Level

8 A passes • 1 B

PROJECTS

Stella Fit — Landing Page & Marketing Concept

2026

Role: Designer & Developer

- Created a visual identity for a fictional personal training brand, including its colour palette, typography and overall visual direction.
- Designed and developed a responsive landing page with a clear content structure and focused call-to-action.
- Applied marketing principles such as trust signals, social proof and audience-focused messaging to the page.
- Planned a simple A/B test and analytics event to explore which page variation could generate better engagement.

Technologies: HTML, CSS, JavaScript, Canva, Claude AI

Live project: stellafitlandingpage.netlify.app

DropSwift — Website & Customer Communication Project

2026

Role: Designer & Developer

- Designed and developed a website concept for a fictional product, using visual and written communication to establish trust and create urgency.
- Created different messaging approaches for new visitors and users who had already shown interest in the product.
- Built a short automated three-email sequence for new users after signup using Nodemailer.
- Focused on how website messaging and follow-up communication can support the customer journey.

Technologies: HTML, CSS, JavaScript, Canva, Nodemailer

Live project: dropswiftlandingpage.netlify.app

Personal Portfolio Website

2026

Role: Designer & Developer

- Designed and developed a seven-page personal portfolio website from concept to implementation.
- Created a consistent visual design system and applied basic on-page SEO structure.
- Integrated Google Analytics 4 to track visitor sources and better understand how visitors interact with the website.

Technologies: HTML, CSS, JavaScript, Google Analytics 4

Live project: portfolioyashendri.vercel.app

CookMate — Mobile Application

2025 – 2026

Role: Backend Developer, Team Project

- Contributed to a team-based mobile application by developing authentication and user-related features.
- Implemented Google Sign-In and email-based password reset functionality with time-limited codes.
- Worked with user data including favourites, preferences, ratings and reviews.
- Collaborated with a multi-person development team using Git and GitHub.

Technologies: React Native, TypeScript, Node.js, Firebase, Firestore

Repository: github.com/yehenidodanwela/CookMate
